

Frequently Asked Questions

CSX-3 Centralized Splitter and Cross-Connect Cabinets

Question

Answer

What are the dimensions and weight of the CSX-3 Pad Mount cabinets?

288	432	864
38"x24"x16" 150 lbs	48"x24"x16" 170 lbs	48"x48"x19" 300 lbs

Note: 288 and 432 Pole Mount cabinets are 8 inches shorter.

Are the cabinets field expandable?

Yes - the 432 and 864 cabinet capacity can be expanded by adding 144 and 216f stubbed shelf assemblies in the field. These cabinets must be ordered with a minimum distribution capacity of 50% of the maximum cabinet capacity. The 288 cabinet is not field expandable.

Are splitters included with CSX-3 cabinets?

No - the CSX-3 cabinets are shipped without splitters mounted inside. Splitters are sold separately.

What cable stub options are available?

While the CSX-3 cabinets are shipped with 100 ft cable stubs of either loose-tube dielectric or ribbon armored cable types as standard, a variety of optional cable types, fiber types, and stub lengths are available. Please consult with customer service for options. Selected cable options may impact price and lead time.

What connector and adapter types are available?

SC/APC connectors are standard for CSX-3 cabinets. SC/UPC connectors/adapters are an option. Selected connector options may impact price and lead time.

Are CSX-3 cabinets delivered ready for use as splitter and/or cross-connect cabinets?

Yes - basic cabinet configurations support both centralized splitting and cross-connecting; however, splitter modules and cross-connect kits are sold separately from the cabinets.

Are pass-thru (point-to-point) ports available?

Yes - all CSX-3 cabinets have multiple input panel configurations ranging from 24 to 144 fibers so that pass-thru ports can be available on all cabinets configured for 1:32 thru 1:8 splitters. Pass-thru specifications are included in the CSX-3 brochure and available at www.us.telecomosp.com.

Can I buy the CSX-3 cabinet without cable stubs and configured for customer splicing within the cabinet?

Yes - the CSX-3 cabinet product line has been designed to include a splice basket for this purpose. This is an option when configuring the cabinet product description.

Is the pole mount hardware included with the pole mount cabinet configuration?

No - the pole mounting hardware kit is sold separately from the cabinet.
